Forecast for Saturday 14 Oct 2023

Weather: Clear or bright spells and occasional snow showers, falling as rain or sleet below 300m. Some showers will be heavy with hail and a small risk of lightning. Windy and very cold conditions with temporary blizzard conditions in heavier showers on the tops.

Chance of cloud-free hill tops above 800m: 40%. Summits will regularly clear between showers.

Low cloud and visibility: Highly variable and fast-changing. Spells of excellent visibility between showers but plunging to very poor as showers move through with cloud descending to 300m at times. Lying snow blowing about in gusty winds.

Met Office Aberdeen Meteorologist's View

Advice from our partners at Mountaineering Scotland: Saturday will bring the first taste of full winter weather in the hills this autumn with strong winds, severe wind chill and snow showers in the forecast. Please ensure you have the correct clothing, equipment and skills required and choose a route appropriate for the conditions. Remember to be flexible with plans and consider enjoying a low-level route if the conditions up high look too much.
